

Here's a great opportunity
to help our teens who are transitioning
from high school to college . . .

Cochlear Implant University

Parent and Student Participation Needed

You've seen CI University promoted on our national website and in our e-News.

And here's the best part for the New Jersey Chapter of AG Bell --

KDH Research & Communication (KDHRC), the research firm funded by the National Institute on Deafness and Other Communication Disorders, which is conducting this research, will offer a **\$500 gift** to the AG Bell chapter that enrolls the most participants in the study.

High school students (grades 10 through 12) or college students (freshmen through seniors) with cochlear implants and parents of students who are in high school or college, and not necessarily the parents of students in the study, are invited to participate in a research study to help evaluate Cochlear Implant University (CIU), which is an interactive, self-advocacy, skills-building online resource.

You may enroll through the end of February

Eligible student participants will complete two online surveys to answer questions about self-advocacy and the transition to college and may be asked to review the CIU website. Eligible parent participants will complete two online surveys to answer questions about the transition to college and supporting their students and may also review the CIU website. Participation should take between two and four hours, spaced out over various periods of time.

There's even a reward in it for you!

Visit www.agbell.org/CIUniversity/ for more information

If you participate, make sure you let KDHRC know (by answering Question #2) that you found out about the study from the New Jersey AG Bell chapter!

Let's make sure New Jersey has the most participants.

Everyone will benefit!
